Item 4: Advisory Business

Firm Description

Antigravity Investments Inc. (“AI”) is a Delaware C-Corporation that was formed in July 2017. William Brendon Li-Wei Wong (“Brendon Wong”) is 100% owner. Under CCR Section 260.238(k), AI, its representatives or any of its employees will disclose to Clients all material conflicts of interest.

Types of Advisory Services

ASSET MANAGEMENT

AI offers discretionary asset management services to advisory Clients. AI will offer Clients ongoing asset management services through determining individual investment goals, time horizons, objectives, and risk tolerance. Investment strategies, investment selection, asset allocation, portfolio monitoring and the overall investment program will be based on the above factors.

Antigravity categorizes its asset management services into High-Yield Savings, Market-Linked Investing, Semi-Market-Linked Investing, and Non-Market-Linked Investing. High-Yield Savings refers to very-low-volatility investments and strategies, like cash equivalents. Market-Linked Investing refers to strategies that aim to perform similarly to market indexes. Semi-Market-Linked Investing refers to strategies that aim to perform similarity to market indexes with certain exceptions (e.g. targeting lower volatility in high-volatility environments). Non-Market-Linked Investing refers to strategies that aim to be partially or predominantly uncorrelated to market indexes.

Antigravity offers advisory services in areas pertaining to donors and charities. These services can be categorized into Self-Managed Investing Advice, Impact Investing and Philanthropy Advising, and Outsourced CIO Services. Self-Managed Investing Advice refers to helping charitable entities with self-directed investment approaches. This advice is generally provided at no charge. Impact Investing and Philanthropy Advising refers to helping donors and charitable entities make donations and investments for the sole purpose of achieving positive social impact or the dual purposes of achieving positive social impact alongside a financial return. Outsourced CIO refers to helping a charitable entity manage all aspects of their investing, as opposed to just a fraction of their portfolio. Outsourced CIO is essentially a higher-touch, comprehensive version of our asset management services.

The Client will authorize AI discretionary authority to execute selected investment program transactions as stated within the Investment Advisory Agreement.

FINANCIAL PLANNING AND CONSULTING

Financial planning services include a comprehensive evaluation of an investor's current and future financial state and will be provided by using currently known variables to predict future cash flows, asset values and withdrawal plans. AI will use current net worth, tax liabilities, asset allocation, and future retirement and estate plans in developing financial plans.

Typical topics reviewed in a financial plan may include but are not limited to:

- **Financial goals:** Based on an individual's or a family's clearly defined financial goals, including funding a college education for the children, buying a larger home,

starting a business, retiring on time or leaving a legacy. Financial goals should be quantified and set to milestones for tracking.

- **Personal net worth statement:** A snapshot of assets and liabilities serves as a benchmark for measuring progress towards financial goals.
- **Cash flow analysis:** An income and spending plan determines how much can be set aside for debt repayment, savings and investing each month.
- **Retirement strategy:** A strategy for achieving retirement independent of other financial priorities. Including a strategy for accumulating the required retirement capital and its planned lifetime distribution.
- **Comprehensive risk management plan:** Identify all risk exposures and provide the necessary coverage to protect the family and its assets against financial loss. The risk management plan includes a full review of life and disability insurance, personal liability coverage, property and casualty coverage, and catastrophic coverage.
- **Long-term investment plan:** Include a customized asset allocation strategy based on specific investment objectives and a risk profile. This investment plan sets guidelines for selecting, buying and selling investments and establishing benchmarks for performance review.
- **Tax reduction strategy:** Identify ways to minimize taxes on personal income to the extent permissible by the tax code. The strategy should include identification of tax-favored investment vehicles that can reduce taxation of investment income.

If a conflict of interest exists between the interests of AI and the interests of the Client, the Client is under no obligation to act upon AI's recommendation. If the Client elects to act on any of the recommendations, the Client is under no obligation to effect the transaction through AI. Financial plans will be completed and delivered inside of ninety (90) days contingent upon timely delivery of all required documentation. Under CCR Section 260.235.2, it requires that the conflict of interest, which exists between the interests of the investment advisor and the interests of the client when offering financial planning services, be disclosed.

Client Tailored Services and Client Imposed Restrictions

The goals and objectives for each Client are documented in our Client files. Investment strategies are created that reflect the stated goals and objectives. Clients may impose restrictions on investing in certain securities or types of securities.

Agreements may not be assigned without written Client consent.

Wrap Fee Programs

AI does not sponsor any wrap fee programs.

Client Assets under Management

AI has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$0	\$0	April 21, 2025

Item 5: Fees and Compensation

Method of Compensation and Fee Schedule

ASSET MANAGEMENT

AI offers discretionary direct asset management services to advisory Clients. AI charges an annual investment advisory fee of no more than 1.0% based on the total assets under management. Pursuant to CCR Section 260.238(j), lower fees for comparable services may be available from other sources. Total fees to Client will never exceed the safe harbor threshold of 3% of assets under management per year.

The annual fee is negotiable based upon certain criteria (e.g., historical relationship, type of assets, anticipated future earning capacity, anticipated future additional assets, dollar amounts of assets to be managed, related accounts, account composition, negotiations with Clients, etc.). AI considers cash to be an asset class, and as such is included in fee calculations. Also, to be noted at times fees will exceed the money market yield. Fees are billed quarterly in arrears based on the amount of assets managed as of the close of business on the last business day of the previous quarter.

Lower fees for comparable services may be available from other sources. Clients may terminate their account within five (5) business days of signing the Investment Advisory Agreement with no obligation and without penalty. After the initial five (5) business days, the agreement may be terminated by AI with thirty (30) days written notice to Client and by the Client at any time with written notice to AI. For accounts opened or closed mid-billing period, fees will be prorated based on the days services are provided during the given period. All unpaid earned fees will be due to AI. Client shall be given thirty (30) days prior written notice of any increase in fees. Any increase in fees will be acknowledged in writing by both parties before any increase in said fees occurs.

FINANCIAL PLANNING AND CONSULTING

AI charges \$150 per hour for financial planning and consulting services based on complexity and unique Client needs for financial planning. Prior to the planning process the Client will be provided an estimated plan fee.

Fees for financial plans are due upon delivery of the completed plan.

Services are completed and delivered inside of ninety (90) days contingent upon timely delivery of all required documentation. Client may cancel within five (5) business days of signing Agreement with no obligation and without penalty. If the Client cancels after five (5) business days, any unearned fees will be refunded to the Client, or any unpaid earned fees will be due to AI. AI reserves the right to waive the fee should the Client implement the plan through AI.

Client Payment of Fees

Fees for asset management services are deducted from a designated Client account to facilitate billing or they may pay AI directly. The Client must consent in advance to direct debiting of their investment account.

Fees for financial plans will be billed to the Client and paid directly to AI.

Additional Client Fees Charged

Custodians may charge transaction fees and other related costs on the purchases or sales of mutual funds, equities, bonds, options and exchange-traded funds. Mutual funds, money market funds and exchange-traded funds also charge internal management fees, which are

disclosed in the fund's prospectus. AI does not receive any compensation from these fees. All of these fees are in addition to the management fee you pay to AI. For more details on the brokerage practices, see Item 12 of this brochure.

Prepayment of Client Fees

AI does not require any prepayment of fees.

External Compensation for Client Referrals to Third Parties

AI receives external compensation for the referral of Clients to American Deposit Management, LLC (ADM) and StoneCastle Cash Management, LLC (SCM) for deposit management services.

Item 6: Performance-Based Fees and Side-by-Side Management

Sharing of Capital Gains

Fees are not based on a share of the capital gains or capital appreciation of managed securities.

AI does not use a performance-based fee structure because of the conflict of interest. Performance based compensation may create an incentive for AI to recommend an investment that may carry a higher degree of risk to the Client.

Item 7: Types of Clients

Description

AI generally provides investment advice to individuals, high net worth individuals, trusts, estates, or charitable organizations, corporations or business entities. Client relationships vary in scope and length of service.

Account Minimums

AI requires a minimum of \$250,000 to open an account. In certain instances, the minimum account size may be lowered or waived.

Item 8: Methods of Analysis, Investment Strategies and Risk of Loss

Methods of Analysis

Security analysis methods may include fundamental analysis, technical analysis, and cyclical analysis. Investing in securities involves risk of loss that Clients should be prepared to bear. Past performance is not a guarantee of future returns.

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Cyclical analysis assumes that the markets react in cyclical patterns which, once identified, can be leveraged to provide performance. The risks with this strategy are twofold: 1) the markets do not always repeat cyclical patterns; and 2) if too many investors begin to implement this strategy, then it changes the very cycles these investors are trying to exploit.

We may also utilize quantitative analysis techniques as a part of our research process.

Quantitative analysis refers to economic, business or financial analysis that aims to understand or predict behavior or events through the use of mathematical measurements and calculations, statistical modeling and research. Quantitative analysts aim to represent a given reality in terms of a numerical value. Quantitative analysis is employed for a number of reasons, including measurement, performance evaluation or valuation of a financial instrument, and predicting real world events such as changes in a country's gross domestic product (GDP) growth rate.

In general terms, quantitative analysis can best be understood as simply a way of measuring or evaluating things through the examination of mathematical values of variables. The primary advantage of quantitative analysis is that it involves studying precise, definitive values that can easily be compared with each other, such as a company's year-over-year revenues or earnings.

Investment Strategy

The investment strategy for a specific Client is based upon the objectives stated by the Client during consultations. The Client may change these objectives at any time by providing written notice to AI. Each Client executes a Client profile form or similar form that documents their objectives and their desired investment strategy.

Security Specific Material Risks

All investment programs have certain risks that are borne by the investor. Our investment approach constantly keeps the risk of loss in mind. Investors face the following investment risks and should discuss these risks with AI:

- *Market Risk:* The prices of securities in which clients invest may decline in response to certain events taking place around the world, including those directly involving the companies whose securities are owned by a fund; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency, interest rate and commodity price fluctuations. Investors should have a long-term perspective and be able to tolerate potentially sharp declines in market value.
- *Interest-rate Risk:* Fluctuations in interest rates may cause investment prices to fluctuate. For example, when interest rates rise, yields on existing bonds become less attractive, causing their market values to decline.
- *Inflation Risk:* When any type of inflation is present, a dollar today will buy more than a dollar next year, because purchasing power is eroding at the rate of inflation.
- *Currency Risk:* Overseas investments are subject to fluctuations in the value of the dollar against the currency of the investment's originating country. This is also referred to as exchange rate risk.

- *Reinvestment Risk:* This is the risk that future proceeds from investments may have to be reinvested at a potentially lower rate of return (i.e. interest rate). This primarily relates to fixed income securities.
- *Liquidity Risk:* Liquidity is the ability to readily convert an investment into cash. Generally, assets are more liquid if many traders are interested in a standardized product. For example, Treasury Bills are highly liquid, while real estate properties are not.
- *Management Risk:* The advisor's investment approach may fail to produce the intended results. If the advisor's assumptions regarding the performance of a specific asset class or fund are not realized in the expected time frame, the overall performance of the client's portfolio may suffer.
- *Equity Risk:* Equity securities tend to be more volatile than other investment choices. The value of an individual mutual fund or ETF can be more volatile than the market as a whole. This volatility affects the value of the client's overall portfolio. Small- and mid-cap companies are subject to additional risks. Smaller companies may experience greater volatility, higher failure rates, more limited markets, product lines, financial resources, and less management experience than larger companies. Smaller companies may also have a lower trading volume, which may disproportionately affect their market price, tending to make them fall more in response to selling pressure than is the case with larger companies.
- *Fixed Income Risk:* The issuer of a fixed income security may not be able to make interest and principal payments when due. Generally, the lower the credit rating of a security, the greater the risk that the issuer will default on its obligation. If a rating agency gives a debt security a lower rating, the value of the debt security will decline because investors will demand a higher rate of return. As nominal interest rates rise, the value of fixed income securities held by a fund is likely to decrease. A nominal interest rate is the sum of a real interest rate and an expected inflation rate.
- *Investment Companies Risk:* When a client invests in open end mutual funds or ETFs, the client indirectly bears their proportionate share of any fees and expenses payable directly by those funds. Therefore, the client will incur higher expenses, which may be duplicative. In addition, the client's overall portfolio may be affected by losses of an underlying fund and the level of risk arising from the investment practices of an underlying fund (such as the use of derivatives). ETFs are also subject to the following risks: (i) an ETF's shares may trade at a market price that is above or below their net asset value or (ii) trading of an ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are de-listed from the exchange, or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally. Adviser has no control over the risks taken by the underlying funds in which client invests.

Item 9: Disciplinary Information

Criminal or Civil Actions

AI and its management have not been involved in any criminal or civil action.

Administrative Enforcement Proceedings

AI and its management have not been involved in administrative enforcement proceedings.

Self-Regulatory Organization Enforcement Proceedings

AI and its management have not been involved in any self-regulatory organizational enforcement proceedings that are material to a Client's or prospective Client's evaluation of AI or the integrity of its management.

Item 10: Other Financial Industry Activities and Affiliations

Broker-Dealer or Representative Registration

AI is not registered as a broker-dealer and no affiliated representatives of AI are registered representatives of a broker-dealer.

Futures or Commodity Registration

Neither AI nor its affiliated representatives are registered or have an application pending to register as a futures commission merchant, commodity pool operator, or a commodity trading advisor.

Material Relationships Maintained by this Advisory Business and Conflicts of Interest***StoneCastle Cash Management, LLC ("SCM")***

AI may refer Clients to SCM for deposit management services provided by SCM. SCM may pay AI a referral fee for these referrals, calculated via the client's deposit balance with SCM. StoneCastle Cash Management, LLC does not provide investment services or securities as part of its deposit management services.

American Deposit Management, LLC ("ADM")

AI may refer Clients to ADM for deposit management services provided by ADM. ADM may pay AI a referral fee for these referrals, calculated via the client's deposit balance with ADM. American Deposit Management, LLC does not provide investment services or securities as part of its deposit management services.

These practices represent conflicts of interest because they give an incentive to recommend products based on the fees received. This conflict is mitigated by disclosures, procedures, and the firm's Fiduciary obligation to place the interest of the Client first and the Clients are not required to purchase any products. Clients have the option to purchase these products through another deposit management service of their choosing.

Recommendations or Selections of Other Investment Advisors and Conflicts of Interest

AI does not select or recommend other investment advisors.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Code of Ethics Description

The affiliated persons (affiliated persons include employees and/or independent contractors) of AI have committed to a Code of Ethics ("Code"). The purpose of our Code is to set forth standards of conduct expected of AI affiliated persons and addresses conflicts that may arise. The Code defines acceptable behavior for affiliated persons of AI. The Code reflects AI and its supervised persons' responsibility to act in the best interest of their Client.

One area which the Code addresses is when affiliated persons buy or sell securities for their personal accounts and how to mitigate any conflict of interest with our Clients. We do not allow any affiliated persons to use non-public material information for their personal profit or to use internal research for their personal benefit in conflict with the benefit to our Clients.

AI's policy prohibits any person from acting upon or otherwise misusing non-public or inside information. No advisory representative or other affiliated person, officer or director of AI may recommend any transaction in a security or its derivative to advisory Clients or engage in personal securities transactions for a security or its derivatives if the advisory representative possesses material, non-public information regarding the security.

AI's Code is based on the guiding principle that the interests of the Client are our top priority. AI's officers, directors, advisors, and other affiliated persons have a fiduciary duty to our Clients and must diligently perform that duty to maintain the complete trust and confidence of our Clients. When a conflict arises, it is our obligation to put the Client's interests over the interests of either affiliated persons or the company.

The Code applies to "access" persons. "Access" persons are affiliated persons who have access to non-public information regarding any Clients' purchase or sale of securities, or non-public information regarding the portfolio holdings of any reportable fund, who are involved in making securities recommendations to Clients, or who have access to such recommendations that are non-public.

AI will provide a copy of the Code of Ethics to any Client or prospective Client upon request.

Investment Recommendations Involving a Material Financial Interest and Conflict of Interest

AI and its affiliated persons do not recommend to Clients securities in which we have a material financial interest.

Advisory Firm Purchase of Same Securities Recommended to Clients and Conflicts of Interest

AI and its affiliated persons may buy or sell securities that are also held by Clients. In order to mitigate conflicts of interest such as trading ahead of Client transactions, affiliated persons are required to disclose all reportable securities transactions as well as provide AI with copies of their brokerage statements.

The Chief Compliance Officer of AI is Brendon Wong. He reviews all trades of the affiliated persons each quarter. The personal trading reviews ensure that the personal trading of affiliated persons does not affect the markets and that Clients of the firm receive preferential treatment over associated persons' transactions.

Client Securities Recommendations or Trades and Concurrent Advisory Firm Securities Transactions and Conflicts of Interest

AI does not have a material financial interest in any securities being recommended. However, affiliated persons may buy or sell securities at the same time they buy or sell securities for Clients. In order to mitigate conflicts of interest such as front running, affiliated persons are required to disclose all reportable securities transactions as well as provide AI with copies of their brokerage statements.

The Chief Compliance Officer of AI is Brendon Wong. He reviews all trades of the affiliated persons each quarter. The personal trading reviews ensure that the personal trading of

affiliated persons does not affect the markets and that Clients of the firm receive preferential treatment over associated persons' transactions.

Item 12: Brokerage Practices

Factors Used to Select Broker-Dealers for Client Transactions

AI will recommend the use of a particular broker-dealer based on their duty to seek best execution for the client, meaning they have an obligation to obtain the most favorable terms for a client under the circumstances. The determination of what may constitute best execution and price in the execution of a securities transaction by a broker involves a number of considerations and is subjective. Factors affecting brokerage selection include the overall direct net economic result to the portfolios, the efficiency with which the transaction is affected, the ability to effect the transaction where a large block is involved, the operational facilities of the broker-dealer, the value of an ongoing relationship with such broker and the financial strength and stability of the broker. AI will select appropriate brokers based on a number of factors including but not limited to their relatively low transaction fees and reporting ability. AI relies on its broker to provide its execution services at the best prices available. Lower fees for comparable services may be available from other sources. Clients pay for any and all custodial fees in addition to the advisory fee charged by AI. AI does not receive any portion of the trading fees.

For the benefit of no commissions or transaction fees, fully digital account opening, a large variety of security options and complete integration with software tools, AI recommends Altruist Financial LLC, an unaffiliated SEC-registered broker dealer and FINRA/SIPC member, as the introducing broker to Apex Clearing Corporation, an unaffiliated SEC-registered broker dealer and FINRA/SIPC member, as the clients' custodian. AI does not receive any research or other soft-dollar benefit by nature from its relationship with Altruist Financial LLC. AI does not receive any referrals in exchange for using Altruist Financial LLC as a broker dealer.

AI also recommends the use of the broker-dealer, Altruist for custodial purposes.

- *Research and Other Soft Dollar Benefits*
AI does not receive any soft dollar benefits.
- *Brokerage for Client Referrals*
AI does not receive client referrals from any custodian or third party in exchange for using that broker-dealer or third party.
- *Directed Brokerage*
Clients who direct brokerage outside our recommendation may be unable to achieve the most favorable execution of client transactions as client directed brokerage may cost clients more money. For example, in a directed brokerage account, you may pay higher brokerage commissions because we may not be able to aggregate orders to reduce transaction costs, or you may receive less favorable prices.

Aggregating Securities Transactions for Client Accounts

AI manages each account separately, and therefore, does not aggregate purchases and sales and other transactions. If orders are not aggregated, some clients purchasing securities around the same time may receive a less favorable price than other clients which may cost clients more money.

Item 13: Review of Accounts

Schedule for Periodic Review of Client Accounts or Financial Plans and Advisory Persons Involved

Account reviews are performed quarterly by the Chief Compliance Officer of AI, Brendon Wong. Account reviews are performed more frequently when market conditions dictate. Reviews of Client accounts include, but are not limited to, a review of Client documented risk tolerance, adherence to account objectives, investment time horizon, and suitability criteria, reviewing target allocations of each asset class to identify if there is an opportunity for rebalancing, and reviewing accounts for tax loss harvesting opportunities.

Financial plans generated are updated as requested by the Client and pursuant to a new or amended agreement, AI suggests updating at least annually.

Review of Client Accounts on Non-Periodic Basis

Other conditions that may trigger a review of Clients' accounts are changes in the tax laws, new investment information, and changes in a Client's own situation.

Content of Client Provided Reports and Frequency

Clients receive written account statements no less than quarterly for managed accounts. Account statements are issued by AI's custodian. Client receives confirmations of each transaction in account from custodian and an additional statement during any month in which a transaction occurs. AI does not provide additional reports to Clients.

Item 14: Client Referrals and Other Compensation

Economic Benefits Provided to the Advisory Firm from External Sources and Conflicts of Interest

AI receives compensation from American Deposit Management, LLC and StoneCastle Cash Management, LLC. See Item 10 for additional information.

Advisory Firm Payments for Client Referrals

AI does not compensate for Client referrals.

Item 15: Custody

Account Statements

All assets are held at qualified custodians, which means the custodians provide account statements directly to Clients at their address of record at least quarterly. Clients are urged to carefully compare the account statements received directly from their custodians to any documentation or reports prepared by AI.

AI is deemed to have limited custody solely because advisory fees are directly deducted from Client's accounts by the custodian on behalf of AI.

Pursuant to CCR Section 260.237(b)(3)

- A. The investment adviser has custody of the funds and securities solely as a consequence of its authority to make withdrawals from client accounts to pay its advisory fee.
- B. The investment adviser has written authorization from the client to deduct advisory fees from the account held with the qualified custodian.
- C. Each time a fee is directly deducted from a Client account, the investment adviser concurrently:
 - i. Sends the qualified custodian an invoice or statement of the amount of the fee to be deducted from the client's account; and
 - ii. Sends the client an invoice or statement itemizing the fee. Itemization includes the formula used to calculate the fee, the value of the assets under management on which the fee is based, and the time period covered by the fee.
- D. The investment adviser notifies the Commissioner in writing that the investment adviser intends to use the safeguards provided above. Such notification is required to be given on Form ADV.

Item 16: Investment Discretion

Discretionary Authority for Trading

AI requires discretionary authority to manage securities accounts on behalf of Clients. AI has the authority to determine, without obtaining specific Client consent, the securities to be bought or sold, and the amount of the securities to be bought or sold.

AI allows Clients to place certain restrictions, as outlined in the Client's Investment Policy Statement or similar document. These restrictions must be provided to AI in writing.

The Client approves the custodian to be used and the commission rates paid to the custodian. AI does not receive any portion of the transaction fees or commissions paid by the Client to the custodian.

Item 17: Voting Client Securities

Proxy Votes

AI does not vote proxies on securities. Clients are expected to vote their own proxies. The Client will receive their proxies directly from the custodian of their account or from a transfer agent.

When assistance on voting proxies is requested, AI will provide recommendations to the Client. If a conflict of interest exists, it will be disclosed to the Client. If the Client requires assistance or has questions, they can reach out to the investment advisor representatives of the firm at the contact information on the cover page of this document.

Item 18: Financial Information

Balance Sheet

A balance sheet is not required to be provided to Clients because AI does not serve as a custodian for Client funds or securities and AI does not require prepayment of fees of more than \$500 per Client and six months or more in advance.

Financial Conditions Reasonably Likely to Impair Advisory Firm's Ability to Meet Commitments to Clients

AI has no condition that is reasonably likely to impair our ability to meet contractual commitments to our Clients.

Bankruptcy Petitions during the Past Ten Years

AI has not had any bankruptcy petitions in the last ten years.

Item 19: Requirements for State Registered Advisors

Principal Executive Officers and Management Persons

The education and business background for all management and supervised persons can be found in the Part 2B of this Brochure.

Outside Business Activities

The outside business activities for all management and supervised persons can be found in the Part 2B of this Brochure.

Performance Based Fee Description

Neither AI nor its management receive performance based fees. Please see Item 6 of the ADV 2A for more information.

Disclosure of Material Facts Related to Arbitration or Disciplinary Actions Involving Management Persons

Neither AI nor its management have been involved in any of the following:

1. An award or otherwise been found liable in an arbitration claim alleging damages in excess of \$2,500, involving any of the following:
 - a) An investment or an investment-related business or activity;
 - b) Fraud, false statement(s) or omissions;
 - c) Theft, embezzlement or other wrongful taking of property;
 - d) Bribery, forgery, counterfeiting, or extortion;
 - e) Dishonest, unfair or unethical practices.
 2. An award or otherwise been found liable in a civil, self-regulatory organization, or administrative proceeding involving any of the following:
 - a) An investment or an investment-related business or activity;
 - b) Fraud, false statement(s) or omissions;
 - c) Theft, embezzlement or other wrongful taking of property;
 - d) Bribery, forgery, counterfeiting, or extortion;
 - e) Dishonest, unfair or unethical practices.
-

Material Relationship Maintained by this Advisory Business or Management persons with Issuers of Securities

There are no material relationships with issuers of securities to disclose.

Material Conflicts of Interest Assurance

All material conflicts of interest regarding AI, its representatives or any of its employees which could be reasonably expected to impair the rendering of unbiased and objective advice are disclosed as required under CCR Section 260.238(k).
